## Introduction

### Citation-Quotation

According to traditional Chinese medicine, the pericardial meridian is associated with the pain or fullness in the chest, palpitations, depression, restlessness, manic or depressive disorders, nausea or vomiting, hiccups, gastric pain, and distension in the upper abdomen (Bai and Baron, 2001). Since the parasympathetic modulation of both heart and gut is largely mediated by the vagus nerve, and since vagal stimulation of the gut can result in increased peristalsis while the vagal stimulation of the heart can result in decreased heart rate (Guyton and Hall, 1996), it is speculated that to some extent the pericardium meridian might be associated with the autonomic nervous modulation of the subject.

Acupuncture or acupressure at the Neiguan (P6) point, the most frequently used acupoint in the pericardium meridian, has been shown to lessen nausea and vomiting (Dundee *et al.*, 1987, 1988, 1989a and b; Ho *et al.*, 1989; De Aloysio and Penacchioni, 1992; Belluomini *et al.*, 1994; Fan *et al.*, 1997; Harmon *et al.*, 1999). Since the parasympathetic modulation of both heart and gut is largely mediated by the vagus nerve, and since vagal stimulation of the gut can result in increased peristalsis while the vagal stimulation of the heart can result in decreased heart rate (Guyton and Hall, 1996), it is speculated that to some extent the pericardium meridian might be associated with the autonomic nervous modulation of the subject.

Heart rate variability analysis is a useful, non-invasive method for the assessment of autonomic nervous modulation of heart rate. Some studies have shown that acupressure at the P6 point was performed.

## WHY?

- ❑ To avoid plagiarism
- ❑ To help researchers keep track of the sources cited for their written material
- ❑ To give readers a framework of how the writers' arguments were formed

Check or edit the record fields and decide which one to keep and the other one will be in the Trash

The screenshot shows a dialog box titled "EN Find Duplicates" with a close button in the top right. Below the title bar, it says "Comparing 1 and 2 of 2 duplicates." and "Select the record to keep. The record not selected will be moved to the Trash. Select Skip to go to the next set of duplicates." There are "Skip" and "Cancel" buttons on the right. Below this, there are two "Keep This Record" buttons. The main area is split into two panels. The left panel is for "Ita, 2021 #20" and the right panel is for "Ita, 2021 #106". Both panels show the same metadata fields: Research Notes, URL, File Attachments, Author Address, Figure, and Caption. The URL in the left panel is highlighted with a blue box and contains the text: <https://www.ncbi.nlm.nih.gov/pmc/articles/PMC7832760/pdf/main.pdf>. The URL in the right panel is also highlighted with a blue box but is empty. An orange callout bubble with white text points to the right panel's URL field, saying "Shows a set of duplicates side by side". At the bottom of each panel, it says "Added to Library: 2021/9/30 Last Updated: 2021/9/30" for the left and "Added to Library: 2021/10/14 Last Updated: 2021/10/14" for the right.
